Define the Problem Statements

Ideation Phase

Date	02 October 2026
Team ID	SWTID-2026-9980
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand the ServiceNow customer's point of view. This project focuses on secure record access by dynamically checking specific field values. A well-articulated problem statement helps identify the customer, required access, security barrier, reason for the barrier, and the impact of unauthorized record access.

I am	Describe the customer and their attributes. ServiceNow administrator responsible for protecting records and enforcing secure access.
I'm trying to	List the outcome or job they are trying to achieve. Restrict record access dynamically based on the value of a specific field.
but	Describe the problems or barriers in the way. Users may view records that should be restricted when ACL rules are too broad or static.
because	Enter the root cause of the problem or barrier. Existing ACL conditions may not evaluate field-specific values for every record.
which makes me feel	Describe the emotions resulting from the problem. Concerned about unauthorized data exposure and inconsistent record-level security.

Reference: https://miro.com/templates/customer-problem-statement/

Example:

I am	a traveler
I'm trying to	book flights on my phone
But	it takes a long time
Because	The website is not responsive and doesn't have a mobile version
Which makes me feel	Frustrated

Problem Statement (PS)

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	ServiceNow Administrator	Restrict access to sensitive records	Users may view restricted records	ACLs may not evaluate field-specific values	Concerned about unauthorized exposure
