Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization

This template documents idea generation, grouping and prioritization for a ServiceNow record-security solution.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Selected Problem Statement

ServiceNow records may contain sensitive information that should not be accessible to every user.
A dynamic mechanism is required to restrict record access based on specific field values.

Step-2: Brainstorm, Idea Listing and Grouping

Group 1 – Access Control

- Role-Based Access Control
- User-Based Record Access
- Field-Level Access Control
- Condition-Based Access Control

Group 2 – ServiceNow Security

- ACL-Based Record Restriction
- Scripted ACL
- Table-Level ACL
- Record-Level ACL

Group 3 – Dynamic Security

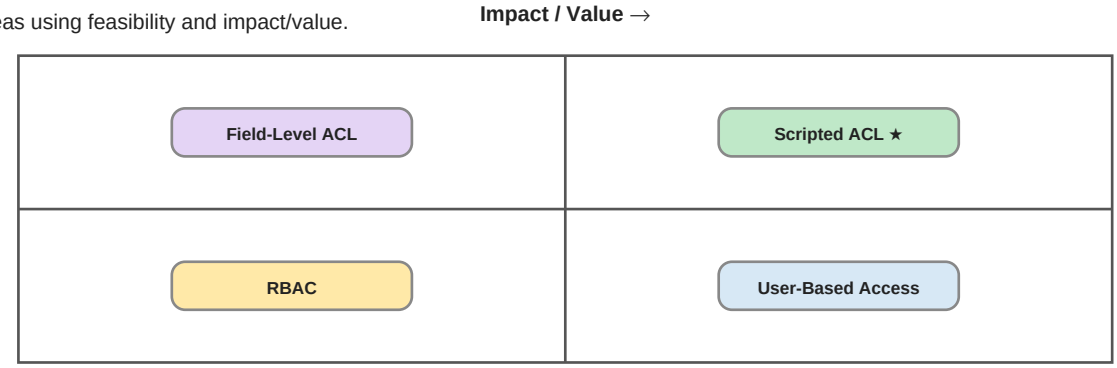
- Restrict access based on field value
- Allow access based on user role
- Record ownership validation
- Dynamic access validation

Group 4 – Monitoring & Testing

- Access restriction testing
- Unauthorized access prevention
- ACL debugging
- Security validation

Step-3: Idea Prioritization

Prioritize ideas using feasibility and impact/value.



Selected / Prioritized Idea
Script-Controlled ACL – Restrict Record Access Based on Field Value
Reason: High feasibility in ServiceNow and strong security impact.
